About Me

I'm a first-year student passionate about building real-world tech products. Currently exploring web development and AI integration, with a focus on creating impactful and user-friendly solutions.

Education

B.E in CSE Artificial Intelligence and Future technologies, Chitkara University, Rajpura, Punjab

(2025–2029)

1st Year

CGPA: 9.55/10 (1st sem.)

Experiences

EvolveAI – Graphics Team

- Contributed to graphics for the club

Projects

1. AI-Powered Research Paper Analyzer:

- Built an AI-based tool that analyzes research papers to extract key insights, summaries, and important concepts, improving readability and saving time for users.

2. Brand Website Generator:

- Developed a web application that automatically generates modern, responsive brand websites using user inputs, streamlining the website creation process.

Skills

Languages: HTML, CSS, JavaScript, Python

Frameworks: React.js (Basic), Node.js (Basic)

AI/ML: Azure AI Fundamentals, AI Concepts (Vision, NLP, Chatbots)

Tools: Git, GitHub, VS Code

Achievements/Participations

- Actively participating in hackathons and tech events
- Exploring startup ecosystems and product development
- Continuous self-learning in web and AI
